

HOW TO CARE FOR YOUR STERLING FAUCET

Sterling® takes special care in the production of each faucet. The high-quality construction of the faucets provides reliable, drip-free performance.

Available in a variety of classic designs and finishes, the faucets will give years of trouble-free operation.

Keep your faucets looking new with these tips:

- For polished brass and other faucets, clean with mild soap and water, rinse well and wipe completely dry with a clean, soft cloth.
- Avoid household cleaners that are abrasive or contain harsh chemicals such as ammonia. They may harm the faucet's finish.
- Keep a chrome faucet sparkling by wiping it with a damp sponge.
